

Full-Service Metal Fabrication for the Power Industry

From large scale and unique structures to small precision cut pieces:

- Ductwork
- Scrubbers for Wet or Dry FGD/ESP Systems
- Stacks
- Tube Sheets
- Air Handlers
- Heat Exchangers
- Tanks and Vessels
- Rolled and Welded Shells

SERVICES

- Forming
- Rolling
- CNC Punching
- Plasma Cutting, high definition up to 6" thick, 12' x 50' plate sizes
- Certified Welding, ASME section IX
- Machining and Vertical Milling
- Production Saw Cutting
- Burning: Large Capacity
- MIG, TIG, SAW and Robotic Welding
- Stud Welding, up to 1" diameter
- 3D Modeling, Solidworks and Autocad
- Passivating
- Painting and Blast Cleaning

MATERIALS

- Stainless Steel
- Carbon Steel
- Nickel Alloys
- Alloys
- Molybdenum
