

# AMECO USA

## CNC Punching

Punching on most metallic materials up to 3/16" thick. Additional solutions are available for thicker materials, as well as structural materials

In addition to providing typical holes and slots, we offer specialty features for your parts such as:

- Louvers
- Tabs
- Countersinks
- Formed Hinges
- Marking
- Embossing
- Bridges
- Knockouts
- Extruded Thread Boss
- Beading

Our forming and fabrication expertise makes us a "ONE STOP" fabricator to meet all your needs

Please Contact us to discuss your needs and projects.
