

# EXPANSION JOINTS

As part of our commitment to providing top-quality bridge components, AMECO USA offers custom-built steel and steel/rubber combination expansion joints. Built to our customer's specifications, expansion joints can be fabricated at any length and ready for installation.

AMECO's flexible manufacturing allows for us to fabricate a variety of expansion joint types to your specifications including:

1. Steel Finger Joint
2. Compression Seal
3. Gland Seal
